

## **Civil Engineer / Project Manager at Hyphae Design Laboratory**

Hyphae is an Oakland based interdisciplinary firm specializing in innovative living systems and environmental design and engineering. Hyphae has a track record of broad collaboration and pushing the limits of traditional design strategies. Signature projects include living walls, greywater and rainwater reclamation systems, green roofs, and green stormwater infrastructure.

Hyphae is seeking a civil engineer at the project management level, offering significant growth potential. Responsibilities will include design and calculation, modeling, drafting, and construction administration. The right candidate will have a passion for innovative and ecologically focused strategies and for pushing the margins of what is possible.

Ideal candidates will be adept and proficient with:

- \*Green stormwater design and management
- \*Grading and drainage
- \*Hydrologic modeling and calculations
- \*Construction, plumbing, and detailing

Additionally, the best candidates should have:

- \*Bachelor's or Master's in Civil Engineering
- \*California P.E. licensed or pending
- \*Experience with SWPPP plans
- \*Strong or excellent knowledge of relevant software platforms including Civil 3D, Revit, and water modeling tools
- \*Working knowledge of relevant code and regulations

Professional skills that will be important:

- \*Independence and the ability to prioritize and be proactive
- \*Confidence with collaboration, management, and client relations
- \*Strong visual communication skills

Compensation is negotiable based on experience.

Hyphae offers a flexible work environment and the opportunity to be involved with a variety of work in multiple capacities. If you are excited about groundbreaking work in a collaborative environment, we would love to get to know you.

Please send your cover letter and resume to [jobs@hyphae.net](mailto:jobs@hyphae.net) before April 1st 2018
