

EHDD is hiring for a research position to support its [Climate Positive Design and Advocacy](#) commitment. We are looking for individuals passionate about sustainability, data, and life cycle thinking. This position offers an opportunity to participate in the development of EHDD's Early Phase Integrated Carbon ([EPIC](#)) Assessment, a data model and web app to support climate-positive design decisions in early project phases. From the range of research projects relevant to EPIC, you will be encouraged to work on projects that maximize impact and connect with your own interests and skills. At some point during your employment, you will be encouraged to give a lunchtime presentation to the office on a topic related to your research.

This research position is a paid full-time position in our San Francisco office. The position will run from approximately June to August, with the possibility for graduating students to continue working with our team beyond the summer. In-person attendance will be required for the duration of the position pending no change to COVID-related protocol, which may require a transition to hybrid or fully remote work.

EHDD is a national leader in design, architecture, and sustainability with exceptional expertise in libraries, education facilities, science buildings, and housing, museums, aquariums, and zoos. We have developed an award-winning practice with a 75-year history that integrates our architectural work with planning, technology, and user experience. Rather than working from preconceived notions, we work outward from the experience of the user and in intense collaboration with clients and consultants. In our office environment, we foster an amiable working culture through close listening and mutual respect.

What we are looking for:

- Research experience
- Experience performing data analysis in Excel, R, or in a GIS platform
- Interest in data visualization and scientific communication
- An eagerness to learn about embodied carbon in the built environment

EHDD is proud to be an equal opportunity employer. To apply or know more, send your cover letter and resume to hr@ehdd.com and epic@ehdd.com. Looking forward to hearing from you!
