Sustainability 2019 Summer Intern

As a member of the Webcor Sustainability Team, you will serve as a knowledge bank for all sustainability-related topics, proactively researching developments in green building rating systems and carbon reduction trends in the construction industry. You will support the Sustainability Department Manager in driving innovative sustainability strategies for the company, developing sustainability training programs and resources, maintaining company green metrics and certifications, and coordinating continuous improvements within Webcor's internal sustainability roadmap. This internship will last approximately 12-14 weeks, with a possibility of extension into the fall (if able).

Requirements:
- Ability to work under pressure and manage multiple projects and deadlines.
- Advanced computer skills with the ability to use MS Office with proficiency (Word, Excel, PowerPoint and Outlook).
- Eagerness to continuously learn.
- Ability to work collaboratively with a team and illustrate consistent team player mentality no matter the task at hand.
- Currently pursuing Master of Science in Sustainability Management, Environmental Studies, Environmental Engineering, Energy Management or other similar degree (preferred).
- Understanding of LEED, WELL and GreenPoint Rating systems (preferred).

The position is in Alameda, CA, with travel to events in San Francisco and around the Bay Area. Please apply online at: Internship Job Posting
